

Elephants

Spring 2

Where the wild things live!

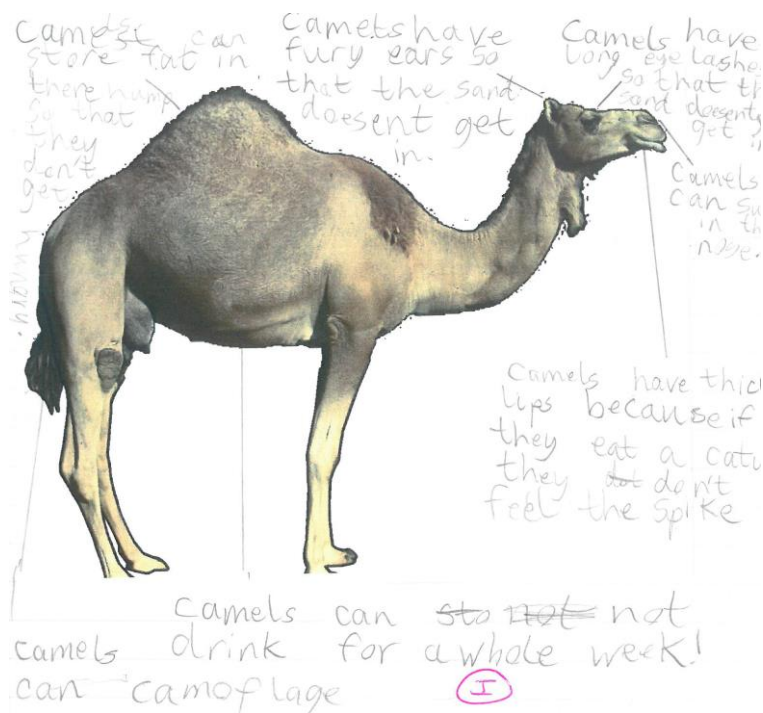

We have read and written lots of stories about animals, have worked really hard on improving our handwriting and some of us are even using joined handwriting in all of our books.

LO. I can write a fairytale build up

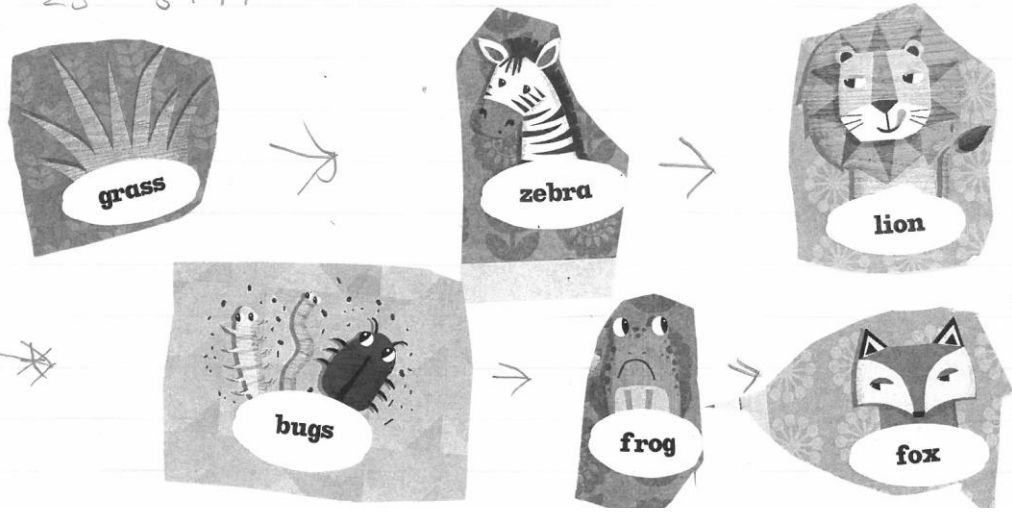

Suddenly the ~~Maana~~ stopped dancing and Mused towards the see through windows, she pushed it open and saw to the beautiful world in her to blue sparkly eyes. She felt lonely, adventures and anxious. She decided to leave the clock tower. & Should I go out?? A asked Maana to her self. But what she didn't know was really bad, if she left the clock tower the world will go to grey and the time will stop!

So I can describe the situation
 from * Jack's point of view.
 Suddenly he was bouncing
 on the fluffy white clouds
 with 10 lizards, they ~~were~~
 were having a play time on
 the clouds. When Jack got
 off the clouds, he asked a huge
 sparrow to fly him into the
~~of~~ castle, that the huge lizards
 had shown him. They went in
 and the sparrow was ~~terrified~~
 terrified so Jack said she
 could wait outside the
 castle. Suddenly ~~an~~ a gnomish
~~gnomish~~ gnomish giant nearly
 caught him! He ran outside
 jumped on the sparrow and
 they got away from the giant.

In Science we have learnt about animals and their
 habitats. We know how animals are adapted to suit
 cold and hot environments and have created some
 food chains.

Lo To. make a food chain.
23.3.17

We have created some of our own wild things and worked hard on our drawing skills.

When I first started joining my handwriting it was very messy but now I can write really neatly. Teagan

I enjoyed learning about animals and sorting out which ones were carnivores, omnivores and herbivores. Isaac

I enjoyed working on my drawing skills and designing my own monster. Dylan

My handwriting used to be really large but now all of the letters are the correct size. Charlie B

I thought learning about how camel's bodies are special so that they can live in the desert was really interesting. Zoe
