

Elephant Class

Inventions!

We have been busy learning all about inventions this half term. We have read stories about crazy inventors creating lots of exciting things in their laboratories and have also learnt about some of the worlds most significant inventions, such as the light bulb.

A really important invention that we have learnt about is electricity. We have found out lots about this and really enjoyed our trip to the Green Britain Centre in Swaffham, where we learned lots about sustainable energy. We all got the opportunity to visit the only wind turbine in the world that has a public viewing platform, we created our own electricity by building mini wind turbines and got to explore a range of eco vehicles.

We have all really enjoyed learning more about Christianity this term in R.E. lessons, especially in the lead up to Christmas. We have learnt about why Christians celebrate Christmas and a range of about a range customs linked to the festival. The children particularly enjoyed learning all about angels and the beliefs that Christians have about them.
