

Elephant Class

Which Way Now?

We have been learning all about the world this half term. We have read books about faraway places and the animals that live there. This has helped us do some fantastic writing and we have also learnt lots about animals and how we categorise them and why. Not only have we learnt about far away lands but we have been using globes and maps to find where these places are. We have looked at the features of maps and created our own, including important features such as coordinates and keys.

In computing we have become expert programmers. We have been thinking about giving clear and accurate instructions when using programming software and when controlling a robot. We have even learnt how to debug our basic programmes when they go wrong!

This half term we have been learning lots about Hinduism in R.E. We have learnt about the beliefs of the Hindu community and how they worship. We particularly enjoyed learning about the Hindu God Brahman and how he is represented in different forms. Our favourite was Ganesh!
